

Enhancements and Fixes for PC-DMIS Planner 2010 MR3

- Screen counters are now part of the Planner's Probe Readouts window
- Upgraded to DataKit V 6.6 libraries (Corrected 3 outstanding issues)
- Added support for Offset Constructed Plane
- Added support for Recall Alignments
- Constructing aPlane from points uses the points' normal to calculate the plane's normal
- Improved support for UG/NX PMI GD&T
- Corrected issue with single click feature selection
